Summary

Passionate and hardworking, always willing to broaden my knowledge on new technologies in my field. In the past few years, I was applying my knowledge as a Java developer in shipping, e-commerce shipping process, Metadata Management Platform, Financial Reporting System and Account Receivable application. Working with a multinational set of colleagues and team members leading in great teamwork and communication skills. Ambition, development, and hard work are my goals for the future.

Skills

- Java 17
